WORK EXPERIENCE

Tata Consultancy Services

Assistant System Engineer | Pune, India | January 2021 - February 2023

Project : CMES (Cummins Manufacturing Execution System)
It is an application used in Cummins manufacturing plants to track product and order details, monitor manufacturing activities and transformation of raw materials to finished products.

- Developed new screens and functionality using HTML , CSS , JavaScript and SQL and performed unit testing for the same.
- Created and modified the Technical design document.
- Debugged and modified the existing code to fix the issue.
- Analysis of existing functionality to find fix for the issue or to locate where to implement new change in functionality.
- Directly worked with client to do configurations for user acceptance testing of new plant of Cummins North America.
- Worked closely with design team to understand the requirement , how it can be implemented and with testing team to understand issue in order to fix it.
- Gave Knowledge Transfer Session to new members in project.

TECHNICAL TRAINING

FRONTEND WEB DEVELOPMENT

Institute: Seven Mentors Pvt Ltd,Pune

- Learning front-end development technologies such as HTML , CSS , JavaScript , Bootstrap , jQuery.
- Built web pages and templates using HTML , CSS.
